Claims 1-3 (cancelled)

Entered.

Claim 4 (currently amended) ~~The method as recited in claim 1, A method for updating authentications in terminals from a central site comprising the steps of:~~

identifying a file associated with a binary executable boot code to update,
wherein said binary executable boot code in said file comprises a first authentication;
updating said first authentication in said binary executable boot code in said
file to become a second authentication;

identifying one or more terminals to be updated with said updated file,
wherein each of said one or more terminals comprises a read only memory configured
to store said binary executable boot code comprising said first authentication; and

updating said binary executable boot code in each of said one or more
identified terminals with said updated file, wherein, upon updating said binary
executable boot code in each of said one or more identified terminals with said
updated file, each of said one or more identified terminals stores said binary
executable boot code comprising said second authentication in said read only
memory;
